

Get your game on this summer.

For four days a week, June 19-29, Yellow Wood is turning into a mental gymnastics zone for kids with intellectual energy to burn. Join us Monday through Thursday from 10am-2pm for these epic summertime activities:

Crime Scene Investigation

Don't just watch CSI. Live it. This eight day activity pits your wits against a mythic criminal who's left behind subtle clues. Collect and analyze evidence to bring the perpetrator to justice. Match fingerprints, collect and analyze DNA and blood samples, and piece together a timeline to solve the crime with your fellow detectives. Discover more about what a real Crime Scene Investigator does. (Suitable for students entering 7th - 12th grades.)

Cooperative Storytelling

Welcome to the unexpected group dynamic of cooperative storytelling. You will create whole new worlds and characters and then combine them cooperatively with the ideas of other students to create compelling stories no one could have imagined independently. By the end of the class, you will have created a unique adventure and story, focusing on each of your created characters. It's how developers work to create today's story-based video games.

3D Chess Set Printing

Can you execute the Stonewall Attack? The Dutch Defense? This eight day summer activity will hone your chess playing skills to new levels. And then, just as you develop a new mastery of chess, we'll move diagonally into computer aided design, 3-D printing and laser cutting to craft your own custom chess set. Students take their unique chess sets home to impress their family and friends with their new strategic and computer fabrication abilities.

Game Design

Equal part learning and gaming, students will be spending two weeks turning their ideas into functional game play. Coding knowledge is not required, and activities will involve both computer games and tabletop fun. Students will learn the basics of programming, some history of the world's most successful games, and how to design a game that is fun to play. Students can either turn their video game vision into a reality individually, or team up with their friends.

Space is limited to 10 participants and tuition is \$750 for the eight sessions.

We'll provide the snacks, you send in the lunch. And if you're looking for an extended day, we provide one to one tutoring from 2:30-5pm. Students can catch up on history, math, English, science or foreign languages. Let us personalize a summer curriculum for your student.

All the World's a Stage

In addition to our previously announced summer camps, we have just added an option for those that want to dive into the world of theater.

Join us June 19-29, Monday through Thursday from 10am-2pm:

Express Yourself

There's no business like show business! From Broadway to schools across America, theatre has the ability to transport people into captivating new worlds. Before making the leap to the big stage however, an actor must learn the tools of their craft. In this dynamic four day session, you're invited to explore the origins of storytelling, playwriting, and performance.

Campers will learn how to improvise in any scenario, use their voice as an instrument, and make strong character choices. In addition to acting out scenes from classic plays, students' own words will come to life as they write, direct, and perform original scripts. Since theatre is always an ensemble effort, students can participate both "on the stage" and behind-the-scenes work, such as costuming, marketing, and set design.

Space is limited to 10 participants and tuition is \$750 for the eight sessions.

We'll provide the snacks, you send in the lunch. And if you're looking for an extended day, we provide one to one tutoring from 2:30-5pm. Students can catch up on history, math, English, science or foreign languages. Let us personalize a summer curriculum for your student.
