

Why we do what we do.

Effective learning occurs when we understand the student and tailor each student's educational experience for his or her unique interests, strengths, and needs.

Our school provides a safe and caring culture and community for students to discover possibilities, challenge themselves, and grow as we provide rich opportunities to learn and explore. Education at Yellow Wood Academy provides meaning and competencies that allow students to move toward

increased self-confidence and life success. Yellow Wood Academy helps students prepare to live and contribute in an ever-changing world with respect for their community, environment, and the diverse culture of others.

Our Vision:

Provide every child with the tools and encouragement to pursue their own personal journey, wherever it may lead. Each child can achieve their unique destiny, whatever it may be.

Our Mission:

We provide a collaborative, accessible learning environment that uniquely engages each student, embraces their potential, and prepares them for their future.

Our Operating Principles:

- We put the needs of students first.
- We embrace change.
- We help each other be our best.
- We do not allow perfection to become the enemy of the darn good.
- We approach our work as though lives depend on it.
- We expect success.

Our Values:

Respect means that I value who you are, what you think and that you exist.

Integrity means doing the right thing, even when no one is looking.

Responsibility means I take ownership for who I am and what I do.

Consideration means I recognize that there are other members of our community and I look beyond myself to consider if the other has a need that I can support.
